Summary

Software Engineer with hands-on experience building and shipping full-stack web applications using JavaScript, React, Node.js, Express.js, MongoDB, REST APIs, authentication, and AI API integrations. Experienced across frontend, backend, databases, payments, and AI-powered workflows, with a focus on building maintainable applications and delivering reliable product features.

Technical Skills

Languages: JavaScript (ES6+), TypeScript **Frontend:** React.js, Next.js, Redux Toolkit, React Router, Tailwind CSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, JWT, RBAC **Database:** MongoDB, Mongoose

AI / Integration: OpenAI API, TMDB API, Firebase Authentication **Tools / Cloud:** Git, GitHub, Docker, Postman, Vercel, Firebase, Linux CLI

Experience

CR Cyber Crime Foundation **Jul 2025 – Dec 2025**

Full Stack Developer – Onsite *Bhubaneswar, India*

- Owned end-to-end development of the organization's public web platform using **React.js, Node.js, Express.js, MongoDB, and Tailwind CSS**, covering UI implementation, backend integration, database connectivity, and deployment.
- Built responsive frontend flows and **REST APIs** for dynamic content and internal workflows, connecting reusable React components with database-backed services.
- Shipped the live platform through the full development lifecycle, coordinating frontend, backend, database, Git, and production deployment work for a public-facing application.

Aioninno Technologies Pvt. Ltd. **Apr 2025 – Jun 2025**

Full Stack Developer Intern – Onsite *Bhubaneswar, India*

- Developed reusable **React.js** components and application features with maintainable component structures and responsive user interfaces.
- Integrated frontend features with **REST APIs**, implementing application data flow, loading and error states, and state-driven rendering.
- Contributed through **Git-based development workflows**, delivering structured code changes across frontend and backend integrations.

Selected Projects

Netflix AI | *React 19, Redux Toolkit, Tailwind CSS, Firebase, OpenAI API, TMDB API* | GitHub | Live **2026**

- Built and deployed an AI-powered movie discovery application with Firebase authentication, protected routes, Redux Toolkit state management, responsive React UI, and TMDB data integration.
- Designed an AI search workflow that converts natural-language queries into **5 movie recommendations per request**, then resolves corresponding TMDB metadata concurrently using `Promise.all`.
- Implemented reusable movie and search components, loading and error states, multilingual UI support, and asynchronous API flows across the AI and movie-data pipeline.

HealthSync – Online Appointment Booking | *MERN, JWT, RBAC, Mongoose, Razorpay* | GitHub **Feb 2026 – Mar 2026**

- Built a full-stack appointment platform supporting **3 user roles – patient, doctor, and admin** – with separate frontend, backend, and administrative workflows.
- Implemented **JWT authentication, RBAC, bcrypt-based credential handling, Mongoose models, and REST APIs** to secure role-specific operations.
- Integrated **Razorpay** into the appointment flow and structured the Express backend into controllers, routes, middleware, models, and configuration modules for maintainable delivery.

Education

Raajdhani Engineering College **May 2026**

B.Tech in Computer Science and Engineering – CGPA: 8.15/10 *Bhubaneswar, India*

Certifications

PW Skills – Full Stack Development | **Namaste Dev** – Namaste React

Udemy – ISO/IEC 42001: AI Management System (AIMS) Implementation | **Udemy** – AI: Navigating Regulations & Standards

Data Structures & Algorithms

JavaScript: Arrays, Strings, Searching/Sorting, Linked Lists, Stacks/Queues, Heaps, Backtracking, complexity analysis, and interview problem solving. GitHub
